The vision for the “Acquainting Agriculture - Grow to Know Him” program is to connect the students to their Creator through hands-on experience in their gardens. God will be their teacher and the garden will be His classroom.

Our prayer is that the students will be able to connect with God in a way they have never done before and that they learn the skills necessary to start and steward their own gardens for His glory.

We use simple, inexpensive, proven methods to grow during the academic school year and to equip students to grow in the future. We will enjoy using these weekly lesson plans (30 lessons) as we “Grow to Know Him.” Each lesson includes a relevant devotional thought, science lesson, health lesson, activities, detailed illustrations, and a place for notes.

Each Student will keep and maintain their own small container garden through the school year at home. Required materials for this will include a clear storage bin with a clear lid and potting soil (further details when class starts).

Text: Acquainting Agriculture – High School Field Guide – Included as part of the materials fee. Book will be provided on the first day of class.

Weekly homework will include reading the next chapter and maintenance of their container garden with weekly tasks.

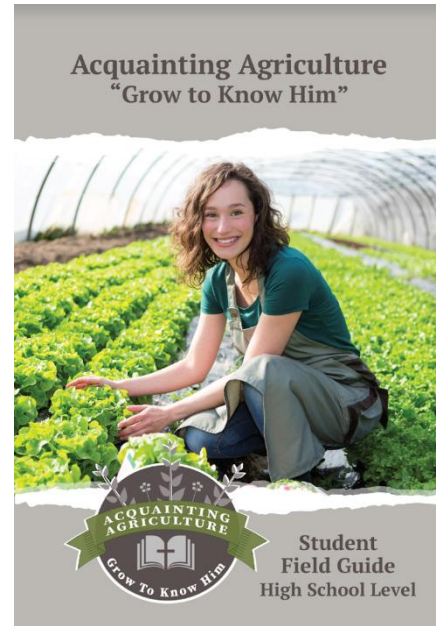

### **Tuition:**

At Registration: Materials Fee of \$95 (nonrefundable – includes text)

Day 1 of First Semester: \$175

Day 1 of Second Semester \$175

Tuition is 75% refundable until 2<sup>nd</sup> week of each semester.

<sup>26</sup> And he said, “The kingdom of God is as if a man should scatter seed upon the ground, <sup>27</sup> and should sleep and rise night and day, and the seed should sprout and grow, he knows not how.

Mark 4:26-27
